

## **Report on School-based After-School Learning and Support Programme (2020 - 2021)**

Due to the persistent effects of the Covid-19 pandemic in Hong Kong in this whole school year, which continues to affect us in the time being, the school had experienced a lengthy suspension and half-day running. As a result, nearly all the planned school-based after-school activities have been terminated or postponed. There is still no clear picture of when and how these after-school activities can be resumed in the foreseeable future.

The online activities that we had held when we had the half-day schooling time are mainly free-of-charge to the student participants. All of the subsidies needed could already be covered, more than enough, by the newly introduced Life Wide Learning Grant and the Student Activities Support Grant.

Hence, like last year, there has not been a chance for us to use the captioned grant this school year.

As for two consecutive years that these situations have persisted, **we will suspend the application for this grant from the EDB for ONE year (2021-2022)** until the conditions are more stable for such needs of the normal functioning of the activities are provided to the needy students.
